BAB I

PENDAHULUAN

1.1. Latar Belakang

Dalam ekosistem pendidikan modern, tantangan utama yang dihadapi adalah rendahnya motivasi dan partisipasi aktif siswa dalam menyelesaikan tugas akademik. Banyak siswa merasa proses pembelajaran konvensional bersifat kaku dan kurang interaktif. LOGNITY hadir sebagai solusi inovatif berupa platform yang memungkinkan siswa untuk saling membantu dalam menemukan jawaban, mengunggah tugas, serta memberikan interaksi sosial terhadap progres belajar teman sejawat. Dengan mengusung konsep gamifikasi, LOGNITY bertujuan mengubah beban akademik menjadi pengalaman yang lebih menyenangkan dan kompetitif melalui sistem poin, *badge*, dan peringkat.

1.2. Profil Startup "LOGNITY"

LOGNITY adalah sebuah startup berbasis teknologi edukasi (EdTech) yang mengintegrasikan sistem manajemen tugas dengan elemen permainan (*game mechanics*). Produk ini mencakup ekosistem *multi-platform* di mana web aplikasi berfungsi sebagai pusat pengelolaan data, sementara aplikasi mobile dikembangkan untuk menjangkau pengguna secara lebih personal dan responsif. Fokus utama aplikasi mobile ini adalah memberikan pengalaman pengguna yang interaktif, mendukung mobilitas siswa, dan menyediakan fitur *real-time* yang selaras dengan data pada platform web.

BAB II

MANAJEMEN PROYEK & PEMBAGIAN TUGAS

2.1. Struktur Tim

Pengembangan aplikasi ini dilakukan secara kolaboratif dengan pembagian peran sebagai berikut:

- **Project Manager (Stiefanny Dwi Chandra):** Memimpin koordinasi tim, menyusun rencana pengembangan, memastikan kepatuhan terhadap *deadline*, dan finalisasi dokumentasi laporan.
- **Mobile App Developer (Aflah Zaki Siregar):** Bertanggung jawab atas pengembangan UI dasar menggunakan Flutter, implementasi struktur navigasi, dan integrasi elemen visual.

- **Web App & Backend Specialist (Aresky Brilliant Sombolinggi):** Bertanggung jawab atas integrasi logika *stateful*, pengelolaan *package* eksternal, manajemen data melalui Firebase, dan sinkronisasi sistem poin.
- **UI/UX Mobile Designer (Elsa Melisa Silaen):** Menyusun prototipe desain di Figma, merancang elemen interaktif, serta menentukan palet warna untuk mode *Day/Night*.

2.2. Rincian Pemenuhan Tugas UTS

Untuk memastikan keseimbangan beban kerja dan pemenuhan seluruh kriteria penilaian UTS, tim menyepakati pembagian teknis sebagai berikut:

Anggota Tim	Rincian Tugas Teknis
Aflah Zaki Siregar	Pembuatan kerangka UI, implementasi 4 <i>Stateless Widgets</i> , dan pengaturan sistem <i>routing</i> (navigasi) 4 halaman.
Aresky Brilliant Sombolinggi	Implementasi <i>Stateful Widget</i> untuk fitur interaksi, penerapan <i>package Google Fonts</i> , dan manajemen <i>source code</i> (Clean & Upload).
Stiefanny Dwi Chandra	Penulisan narasi laporan, penyusunan struktur <i>Widget Tree</i> , dan koordinasi integrasi seluruh komponen UTS.
Elsa Melisa Silaen	Penyediaan aset visual dari prototipe Figma dan perancangan alur navigasi pengguna (<i>Flowchart</i>).

BAB III

RANCANGAN TEKNIS DAN ARSITEKTUR APLIKASI

3.1. Alur Navigasi Aplikasi (Flowchart)

Aplikasi LOGNITY dirancang dengan alur yang intuitif. Pengguna memulai dari halaman *Login* untuk masuk ke dalam ekosistem. Setelah berhasil, pengguna diarahkan ke *Dashboard Utama* yang menjadi pusat navigasi menuju halaman *Daftar Tugas* dan *Leaderboard*. Pada halaman tugas, terdapat logika interaksi sosial di mana pengguna dapat memberikan reaksi yang akan mengubah status data secara dinamis.

3.2. Struktur Widget (Widget Tree)

Berikut adalah hierarki komponen (Widget Tree) yang membangun aplikasi mobile LOGNITY:

Gambar 1. Flowchart Lognity Mobile

BAB IV

IMPLEMENTASI DAN DEMO APLIKASI

4.1. Pemenuhan Syarat Batasan UTS

Implementasi kode program telah memenuhi seluruh batasan yang ditetapkan dalam instruksi UTS:

- 1. Minimal 4 Stateless & 1 Stateful Widget:**
Aplikasi dibangun menggunakan 5 *Stateless Widget* (LognityApp, LoginPage, HomePage, TaskPage, LeaderboardPage) untuk efisiensi render, serta 1 *Stateful Widget* (TaskReactionCard) untuk menangani perubahan status reaksi secara *real-time*.
- 2. Fungsi Navigasi Minimal 4 Halaman:**
Navigasi diimplementasikan menggunakan *Named Routes* yang menghubungkan halaman Login, Dashboard, Tugas, dan Papan Peringkat.
- 3. Widget Umum & Layouting:**
Penggunaan Container dengan gradien warna, Column untuk perataan vertikal, Row untuk elemen horizontal, serta BoxDecoration dengan *rounded corners* besar memberikan kesan aplikasi yang modern dan ramah pengguna.
- 4. Penerapan Assets/Package:**
Menggunakan *package google_fonts* untuk mengimplementasikan tipografi *Quicksand* guna mendukung estetika desain yang "Fun & Happy".

4.2. Rancangan Antarmuka (UI) / Demo Aplikasi

Tampilan antarmuka aplikasi mobile LOGNITY berfokus pada kemudahan akses informasi:

Gambar 2. Welcome page

Menggunakan gradien warna pastel dan ikon roket untuk memberikan kesan antusiasme kepada siswa.

Gambar 3. Dashboard

Menampilkan poin gamifikasi siswa secara menonjol dan akses cepat ke menu utama melalui kartu interaktif.

Gambar 4. Halaman Daftar Tugas

Memfasilitasi interaksi sosial antar siswa dengan fitur "Beri Semangat" yang responsif.

Gambar 5. Halaman Leaderboard

Menampilkan peringkat kompetitif siswa dengan desain kartu yang bersih dan indikator poin yang jelas.

BAB V

PENUTUP & LAMPIRAN

5.1. Kesimpulan

Pengembangan prototipe aplikasi mobile LOGNITY telah berhasil menyelesaikan seluruh kriteria teknis yang disyaratkan dalam Ujian Tengah Semester mata kuliah Aplikasi Perangkat Bergerak. Dengan integrasi elemen gamifikasi dan desain UI yang modern, aplikasi ini siap untuk dikembangkan lebih lanjut ke tahap sinkronisasi data penuh dengan platform web menggunakan Firebase sesuai dengan rencana pengembangan jangka panjang tim.

5.2. Tautan Source Code

Seluruh kode sumber aplikasi telah dibersihkan menggunakan perintah flutter clean untuk optimasi ukuran file dan dapat diakses melalui tautan berikut:

<https://drive.google.com/drive/folders/1GdMwsg-wzAW2dDxRSw-hB-ttGYNiBeWH?usp=sharing>

5.3. Lampiran: Curriculum Vitae (CV) Tim

AFLAH ZAKI SIREGAR
AI & IOT ENGINEER

Jakarta, Indonesia | +62 813-7878-2488 | linkedin.com/in/aflahzaki

High-achieving IT student (GPA 3.91/4.00) specializing in Artificial Intelligence and Machine Learning. Oxygrant Competition winner (IDR 50M grant) for developing VEGRIN, an AI-powered agricultural system. Proficient in Python, Computer Vision, and LLM integration, with experience delivering results in remote/async development environments

AREA OF EXPERTISE

AI & ML Programming	Data Science Tech Stack	REST API Remote Work: ClickUp, GitHub
------------------------	----------------------------	--

PROFESSIONAL EXPERIENCE

Practicum Assistant (Data Structures & C++) Telkom University | Sep 2025 – Jan 2026

- Assisted over 140 undergraduate students in mastering complex C++ concepts, including pointers, linked lists, and algorithm optimization.
- Guided students through practical coding sessions, helping them debug and optimize their C++ code.
- Conducted live debugging sessions and one-on-one mentoring, improving students' coding efficiency and project outcomes.
- Developed innovative teaching methods, fostering higher student participation and better understanding of core programming concepts.

NOTABLE PROJECTS

Statistical Data Analysis & Probability Modeling Academic Project Nov 2024 - Dec 2024

- Conducted exploratory data analysis and computed probability metrics on network traffic datasets using Pandas, NumPy, and SciPy.
- Applied core probability concepts such as normal distributions and hypothesis testing to model data variability and extract statistical insights.
- Produced comprehensive data visualizations using Matplotlib and Seaborn to communicate probability density functions, trends, and feature correlations.
- Evaluated data uncertainty and computationally validated statistical models to ensure robust quantitative reasoning and reliability.

SASIPAH - IoT Pest Repellent (Innovillage Top 165) Project Lead & IoT Engineer Dec 2024 - Feb 2025

- Led a project to develop an IoT-based pest control system for rice fields.
- Design and implement a dual-action system using ESP32, Ultrasonic Sensors (HC-SR04), and UV light traps.
- Engineered the system to autonomously repel rats and neutralize rice ear bugs, reducing the need for chemical pesticides.
- The project was recognized as a Top 165 Innovillage 2024 entry, and the system successfully reduced chemical pesticide reliance in the trial phase.

Network Performance Prediction Model | Project (Python/ML) Feb 2025 - Jun 2025

AI/ML Engineer (Project)

- Developed predictive modeling pipelines in Python using Pandas to clean, transform, and analyze network traffic datasets.
- Trained and evaluated machine learning models (KNN, Decision Tree) to predict network performance indicators and identify key drivers of speed variability.

- Produced data visualizations and exploratory analyses to surface trends, anomalies, and feature relationships that informed model improvements.
- Documented experiments and results for stakeholder review, enabling clear handover and reproducibility in a remote collaboration environment.

AEROTERRA - Automated Simulation Irrigation and Smart Environment System

Nov 2025 - Des 2025

IoT Developer

- Created an automated irrigation control system to optimize water usage in agriculture.
- Develop a system using DHT11 and soil moisture sensors integrated with the Blynk App for remote telemetry.
- Implemented a relay control logic to automate irrigation based on sensor readings, reducing water waste.
- Successfully demonstrated the system's efficiency in reducing water usage by automating pump activation.

VEGRIN - AIoT Smart Agriculture System

Sep 2025 – Present

Project Lead & AIoT Engineer

- Led the end-to-end development of an AIoT smart agriculture system, successfully securing an IDR 50M Oxygrant innovation fund.
- Built a Python backend integrating a Computer Vision pipeline and Gemini API to generate explainable plant disease diagnoses.
- Architected a MySQL database and PHP API routing system secured with MAC Address Locking and Unique API Keys to manage data from 73+ sensors.
- Optimized remote monitoring hardware reliability using a multiplexer (CD74HC4067), solar power management, and Deep Sleep logic.
- Deployed and monitored production-grade API infrastructure in real-time on Google Cloud Platform (GCP).

EDUCATION

Telkom University

Bachelor of Information Technology | 2023 – Present

- **GPA:** 3.91 / 4.00
- **Relevant Coursework:** Embedded Systems, Data Structures & Algorithms, Computer Networks, Artificial Intelligence, Cyber Security.

SKILLS & CERTIFICATIONS

Skill

- IoT Development, Embedded Systems, Cloud Platforms (GCP), Python, C++, Data Structures, Computer Vision, Machine Learning, Smart Agriculture

Certifications

- Google Cloud Certificate – Beginner Cybersecurity

KEY STRENGTHS

- Proven leadership in project management, securing funding (Oxygrant), and delivering scalable, innovative solutions.
- Strong mentorship skills with a focus on explaining complex concepts in an easily digestible format.
- Expertise in both AI and IoT, with hands-on experience in developing and deploying systems in smart agriculture and network performance.
- Passionate about leveraging technology to address real-world challenges in sustainability, agriculture, and IoT.

ARESKY B. SOMBOLINGGI

Student

PROFIL

Saya adalah mahasiswa Telkom University yang sedang menempuh pendidikan. Saya ingin mengembangkan keterampilan di bidang teknologi. Dengan ketertarikan yang kuat terhadap inovasi teknologi, saya siap berkontribusi dan terus belajar dalam industri.

► KETERAMPILAN

- Have a high initiative to learn new technologies independently and adapt quickly.
- Able to communicate effectively in the team, as well as convey technical ideas clearly.
- Accustomed to analyzing complex problems and finding efficient solutions quickly and precisely.

Stiefanny Dwi Chandra

Jakarta, Indonesia | +62 81280003683 | stiefanny19@gmail.com | <https://www.linkedin.com/in/stiefannydwichandra/>

PROFESSIONAL SUMMARY

Data-driven IT student specializing in **Machine Learning and Data Scientist**, with experience in building predictive models (**KNN**, **Decision Tree**) and end-to-end ML pipelines. Proven ability to deliver AI solutions and lead projects, including securing **IDR 50M funding** for an AI-based system.

EDUCATION

- Telkom University** - South Jakarta, Indonesia Sep 2023- Present

Bachelor of Information Technology, GPA: 3.92/4.0

SMAS Daar El Qolam 2 - Banten, Indonesia Jul 2020 - Apr 2023

High School Graduate in Science

 - 1st Place in English Speech Competition, showcasing excellence in articulation, stage presence, and persuasive delivery.
 - Recognized as a **Theater Performer (2022–2023)** for demonstrating creativity and strong teamwork in two public stage productions that gained media attention.
 - Achieved **Finalist status in the 2022 Water Rocket Competition** by showcasing engineering innovation, scientific thinking, and effective collaboration in a STEM environment.
 - Awarded **Best Scientific Paper (2023)** for outstanding academic writing, clear public presentation, and the ability to simplify and communicate complex ideas such as mindfulness.

PROFESSIONAL EXPERIENCE

- Laboratory Assistant (Data Structures & C++)** - South Jakarta, Indonesia Sep 2025 – Jan 2026

Laboratory Assistant of Telkom University (Information Technology)

 - Supported more than 140 undergraduate students in understanding advanced C++ topics such as pointers, linked lists, and algorithm efficiency.
 - Facilitated hands-on lab sessions by guiding students in writing, analyzing, and optimizing their C++ programs.
 - Assisted students in identifying errors and refining their code through structured debugging support and real-time problem solving.
 - Delivered interactive debugging demonstrations and provided personalized mentoring to address individual learning.
 - Contributed to the assessment process by reviewing student assignments and evaluating project outcomes based on coding quality and logic.
- VEGRIN AI Plant Health System (Oxygrant Winner)** - South Jakarta, Indonesia Sep 2025 – Present

Project Manager & AI Engineer

 - Secured IDR 50M funding by leading end-to-end development of an AI-based plant health system
 - Led cross-functional team and defined product roadmap, system architecture, and development workflow
 - Developed Python-based backend and Computer Vision pipeline for image-to-diagnosis system
 - Integrated Gemini API (LLM) to generate explainable outputs (diagnosis, confidence score, recommendations)
 - Monitored performance, mitigated risks, and improved system reliability and user experience

LEADERSHIP EXPERIENCES

- Techcare Innovator Innovillage** - South Jakarta, Indonesia Sep 2024 - Mar2025

Secretary & Data Organizer

 - Wrote project proposals and prepared comprehensive documentation to support initiative planning, stakeholder alignment, and funding applications.
 - Developed custom tools and implemented structured activities to facilitate project operations and ensure measurable deliverables.
 - Edited videos and produced multimedia content to promote project visibility, enhance public engagement, and support digital campaigns.
 - Assisted in project execution and reporting by coordinating logistics, tracking milestones, and compiling detailed progress reports for stakeholders.

Information Technology Student Association (HMIT) – South Jakarta, Indonesia

Talent Division Staff

Sep 2024 – Des 2025

- Managed talent development programs by organizing training sessions, workshops, and internal events to enhance members' soft and technical skills.
- Identified and nurtured members' potential by coordinating talent mapping and performance tracking initiatives.
- Collaborated with cross-functional divisions to support event execution, ensuring smooth coordination and participant engagement.
- Contributed to event planning and execution, including talent sourcing, scheduling, and on-site coordination.
- Developed communication strategies to promote talent programs through digital platforms and internal channels. Assisted in evaluating program effectiveness by collecting feedback and analyzing participant outcomes for continuous improvement.

Crew Organization (Marketing Crew: Vlogcast ; Storytelu) Content Planner - South Jakarta, Indonesia

Marketing Division Staff

Sep 2024 - Present

- Planned and scheduled digital content across platforms to ensure consistency, audience engagement, and alignment with campaign goals.
- Produced podcast and vlog episodes for YouTube, handling scripting, recording, and editing to deliver high-quality and engaging content.
- Executed digital marketing communications by crafting compelling messages, managing online campaigns, and analyzing performance metrics.
- Collaborated with multidisciplinary teams in creative media projects to deliver cohesive outputs, combining visual, audio, and messaging elements.

PROJECT

AI Transaction Classification System for Accounting – South Jakarta, Indonesia

Data Scientist

Sep 2024 – Jan 2025

- Contributed to the development of an AI-based system aimed at assisting transaction recording and classification in branch-level accounting operations.
- Collected, organized, and cleaned real-world financial data to serve as training material for supervised machine learning classification.
- Designed and categorized prompt templates tailored to real transaction scenarios to support model contextual understanding.
- Applied machine learning techniques (KNN & Decision Tree) to classify data and identify key features influencing classification accuracy.
- Conducted system testing, evaluated model performance using accuracy and F1-score, and provided iterative feedback for refinement.

Network Performance Prediction Model – South Jakarta, Indonesia

Python (Machine Learning)

Nov 2025 - Dec 2025

- Designed and implemented end-to-end predictive modeling workflows in Python, leveraging Pandas for data cleaning, transformation, and analysis of network traffic datasets.
- Built and assessed machine learning models such as K-Nearest Neighbors (KNN) and Decision Tree to forecast network performance metrics and uncover factors affecting speed variability.
- Performed exploratory data analysis (EDA) and created insightful visualizations to identify patterns, anomalies, and relationships between features, supporting data-driven model refinement.
- Optimized model performance through feature selection, parameter tuning, and validation techniques to improve prediction accuracy.
- Structured datasets and engineered relevant features to enhance model reliability and interpretability.
- Documented methodologies, experiment results, and model performance clearly to ensure reproducibility and seamless knowledge transfer within a remote team.

ADDITIONAL

Technical Skills: Microsoft Office, Python, SQL, Power BI, R Programming, Data Visualization Tools, Data Cleaning, La Tex, Data Analysis, Google Colab.

Soft Skills: Analytical Thinking, Problem Solving, Storytelling, Reporting, Communication, Time Management

Languages: English, Arabic, Indonesian.

Certifications & Training: Fundamental SQL, Guide to Learn R Programming, Cybersecurity.

CV Elsa Melisa Silaen

Elsa Melisa Silaen

elsasilaen82@gmail.com [+62 858-8382-8230](tel:+62858-8382-8230) <https://www.linkedin.com/in/elsa-melisa-silaen>

SUMMARY OF QUALIFICATIONS

Portfolio

- Extensive experience in website development, system testing (UAT), and data processing (collection, sorting, cleaning).
- Proficient at transforming raw data into structured, actionable insights to drive data-informed decision-making.
- Strong ability to work effectively in independent and collaborative environments, ensuring functionality and user satisfaction.
- Expertise in backend development and cybersecurity using Kali Linux and Ubuntu.
- Skilled in using VirtualBox and UTM for efficient virtualization.
- Experienced in developing IoT solutions using Arduino and ESP32, integrating them across various platforms for impactful projects.
- Strong capabilities in network analysis with Wireshark, including monitoring, troubleshooting, and optimizing network traffic.
- Eager to contribute skills to dynamic projects, while continuing to enhance knowledge in data analysis, development, security, and networking.

EDUCATION

Telkom University, Faculty of Informatics
Majoring in Information Technology
Currently in 6th semester

West Jakarta, Indonesia
GPA: 3.83 /4.00

RELEVANT COURSE WORK

Database Systems,Big Data,Data Mining,Software Development,Artificial Intelligence (AI),Cybersecurity,Computer Networking,Operating Systems,Platform Programming,IoT (Internet of Things) Systems,Software Engineering

TECHNICAL SKILLS

Programming Language
Software

: Python, SQL, JavaScript, Laravel PHP, HTML, CSS, Golang
: Oracle, Visual Studio Code, Microsoft Teams, Excel, Word, Powerpoint, Google Workspace, Figma, Git, Docker, Jupyter, Wireshark, Arduino, ESP32, UTM, VirtualBox, Kali Linux, Ubuntu

CERTIFICATION

Google Cloud Cybersecurity Certificate
Issued by: Google Cloud

Contract
December 2025

- Prepared for roles such as cloud security analyst, cybersecurity specialist, and incident response analyst.
- Covered network security, threat analysis, SQL, incident detection, and documentation.

RELEVANT EXPERIENCE

Faculty of Information Technology Telkom University

Contract

Research Assistant

October 2025 - December 2025

Project Title: Prototype of Portable Architecture-Based Hardware Prevention System to Support Domestic Digital Forensic Tool Production

- Assisted the lecturer with financial record keeping related to the research project.
- Managed permit letters and other administrative duties to ensure smooth project operations.

Lecture's Teaching Assistant (Operating System)

Contract

February 2026 - Present

- Taught 3 classes of 24th batch students for the Operating Systems practical course.
- Conducted practical sessions on Virtualization using VirtualBox, utilizing Kali Linux, Ubuntu Desktop, and Ubuntu Backend.
- Prepared instructional materials and effectively delivered practical sessions.
- Provided hands-on support during practicals and assignments, guiding students through system and software tasks.
- Assigned tasks and reported grades using Microsoft Teams and Microsoft Excel.
- Served as the primary contact for students seeking academic assistance and learning support.

PROJECT EXPERIENCE

Team Leader ABADIGACUNG Innovillage 2024 (Top 165 National)

November 2024 - February 2025

MePUnG (Cassava Flour Grinding Machine): An IoT-Based Innovation for Measuring Flour Moisture Content in Sustainable Agriculture Efforts

Desa Gunung Picung, Kecamatan Pamijahan, Kabupaten Bogor, Jawa Barat

- Led the MePUnG project, developing an IoT-based sweet potato grinder machine that measures moisture content in flour in real-time.
- The grinder accurately detects moisture levels, helping farmers maintain the quality of processed sweet potatoes, ensuring optimal moisture for better quality and longer shelf life.
- Focused on community participation, training local farmers to use the technology, ensuring its adoption as a sustainable long-term solution in agriculture.
- Monitored the success of the program based on community engagement and training participation.
- Led the ABADIGACUNG project, achieving Top 165 in the Innovillage 2024 competition.
- Managed the planning, execution, and submission of the project, ensuring alignment with competition guidelines and objectives.

Event Host – Pengmas TI Event

May 2025

SMPN 67, Jakarta

- Hosted the event titled "Community Service through Basic Education on Information Technology," focusing on introducing basic information technology education.
- Delivered the material titled "Building Middle School Students' Interest in Information Technology through Scratch Learning" to SMP students, fostering interest in technology and programming.
- Guided students in creating their own games using Scratch, encouraging hands-on learning and problem-solving through game development.
- Coordinated with event organizers to ensure smooth execution and engaged with students to maintain a dynamic and interactive learning environment.
